

Elder Abuse Awareness & Prevention Summit

June 2, 2017 | 9:00am – 3:30pm
Holiday Inn Portland South
Wilsonville, OR

Care for older people is often times also about care for people living with dementia. At this year's Elder Abuse Awareness & Prevention Summit, which prefaces World Elder Abuse Awareness Day on June 15, co-collaboratos Oregon Health Care Association (OHCA) and LeadingAge Oregon have partnered to create a special program that allows attends to learn more about dementia and also experience what it's like to live with dementia.

In addition to trainings, all attendees will experience an interactive workshop, the Dementia Live™ experience from AGE-u-cate®. Dementia Live™ Is a high impact experience that immerses participants into life with dementia, resulting in a deeper understanding of what it's like to live with cognitive impairment and sensory change. Participants are outfitted in specialized gear to simulate the dementia experience. They are then given a series of tasks to perform in an enclosed "experience area," where they discover the challenges of life with cognitive impairment.

After the interactive experience participants are advised by an AGE-u-cate® professional to maximize their understanding of what a person who struggles with dementia faces 24 hours a day, seven days a week. Following the experience, the entire audience will engage in a discussion about the experience and review innovative tools to improve communications, care processes, and more.

**All attendees will be able to experience
Dementia Live™!**

Cost

\$59/person
